SUGAR DROPS HALF A CENT

Wholesale Price Goes Higher but Some Retail Grocers Make Reduction of Half Cent a Pound. May be only Temporary.

Sugar, which has been selling in Gettysburg for the past week at eight cents a pound, dropped in a number of the stores this morning to seven and a half even though the wholesale price keeps on advancing. Just how long this lower figure will be maintained it is hard to say as the local grocers are only able to sell it at seven and a half cents so long as their present supply, bought before the recent increase, lasts. They will then have to pay a proportionately high rate and the retail price will go up accordingly.

Not many of the town merchants have an extra supply of sugar on hand and unless the wholesale figure drops within a few days the eight cent price, and probably eight and a half cents, may be expected.

When asked whether or not the people had raised much of a protest about the continued rise in the article which is so necessary at this time of the year one grocer said that the principal objection had come when the figure went from six to six and half cents and that the further raises had not started any complaint. Local people seem to realize that it is not within the power of the retailers to control the price and little dissatisfaction results.

CHURCH NOTICES

CHURCH OF THE BRETHREN
Sunday School 9:30 a. m.; preaching 10:30 a. m.; church 10:30 a. m., by Rev. B. F. Lightner; preaching at Mummaburg at 10:00 a. m., by Rev. G. W. Allison; Shippensburg; preaching 7:30 p. m., by Rev. Mr. Allison.

METHODIST
Sunday School at 9:30 in the morning; preaching service at 10:30; Mrs. P. M. Buck will give a talk on "Missionary Work in India" where she has given such long and faithful service. Epworth League at 6:00 in the evening. Mrs. Buck will also speak in the league. A cordial invitation to all services. L. Dow Ott, pastor.

REFORMED
Sunday School 9:15 a. m.; Rally Day service at 10:30 a. m. Prof. Sanders will talk on the lesson. Church service 7:30 p. m.

EPISCOPAL
Holy Communion 7:30; Sunday School 9:45; morning service 10:30; evening service 7:30.

CATHOLIC
First mass 7, high mass 10, vespers and benediction 7.

LOCAL HORSE WON

Chief interest in Friday's Hanover Fair races centered in the county trot for horses owned in York, Adams and Carroll counties. It was an exciting event from start to finish. Merrie Todd, from the Buttonwood Stock Farm, captured first money in straight heats, but was hard pressed by Dallas, a York novice, Irene Bell, owned by L. M. Slentz, came in third, fourth and fifth in the three heats. The 2:17 pace aroused more enthusiasm than any race of the meet, was closely contested and furnished a great surprise. Ashline Joe, the well known Maryland campaigner, picked as the winner, went lame after the first heat. Lottie M., owned by Harry Gitt and driven by Tommy Johnson, the veteran horseman and care taker of the track, won three successive heats amid great applause.

SURPRISED HON. D. F.

Hon. Daniel F. Lefean, of York, and Leroy K. Lefean, of York, and M. and Mrs. E. E. Peterson, of New York came to Gettysburg Friday in Mr. Lefean's automobile and after taking dinner at Hotel Gettysburg made a tour of the battlefield, Mr. and Mrs. Peterson being guests of Congressman Lefean. As the party entered the car for the battlefield trip they were surprised to find that it had been decorated with two pennants bearing the inscription "Lincoln Way" and pictures of the Capital at Washington and the new federal building to be erected here. Mr. Lefean was highly pleased with the gifts and with the idea of advertising the project in this way. The pennants were the gift of Eckert's store.

FOR SALE or rent: property on Steinwehr avenue with all conveniences. Possession given November 1st. Apply to Brady Sefton.

HAVE your watch, clock and jewelry repaired by Penrose Myers at the old stand, Baltimore street.

17TH CAVALRY HOLDS REUNION

Seventeenth Pennsylvania Cavalry Association Meets here for its Forty Fifth Annual Reunion. Make Tour of Battlefield.

The forty fifth annual reunion of the Seventeenth Pennsylvania Cavalry Association was held here today with a large representation of members from all parts of the state. The veterans had the Pitzer House as their headquarters and held their meeting there.

This morning Mr. Pitzer took those attending the reunion to their monument along the Mummaburg road at the Forney farm. It is one of the most handsome memorials on the First Day's Field, having an imposing relief of a mounted cavalrman. The command was specially active here on the first day of the fight though they were on duty during the entire struggle at Gettysburg.

After the visit to the regimental monument, the new Pennsylvania memorial was visited and no little interest was shown in the tablet containing the names of all the members of the regiment who participated in the Gettysburg fight. The party then returned to the Pitzer House for dinner and business sessions in the afternoon.

The history of the regiment, in course of preparation for several years, was ready for distribution at the reunion and proved of great interest to all who were present.

The officers of the association are president, General E. E. Wood, West Chester; secretary, Lieutenant H. G. Bonebrake; treasurer, Major H. P. Moyer, Lebanon.

FOR GLIDDEN TOUR

The governors of the various states through which the Glidden tour will pass are enthusiastic about the contest and the boom it will give the good roads movement.

During the meeting of the "House of Governors" at Spring Lake, N. J., Governor Hoke Smith extended a formal invitation to the governor of each state through which the route of the tour lies to become his guest while passing through the state. He told the governors he was looking forward to a glorious ride from New York to the gateway of the Florida peninsula. Governor Gilchrist, Florida, said he would get at and Governor Smith's Maxwell car at the Florida state line. Governor Mann said his predecessor in the governor's chair at Richmond had been in the past severely criticised by Virginians for his big expenditure for good roads, but he was in favor of this policy, and deemed it rather an economy than an extravagance.

It is understood Governor Mann will use his influence to have the toll roads through the Shenandoah Valley thrown open to the Glidden tourists. If this is done, it will do away with many vexatious delays at the numerous toll gates through the valley.

200 SPECIAL OFFICERS

The board of managers of the York County Agricultural society will appoint 200 special officers and 150 clerks, turnstile men, gatekeepers and utility men for the 54th annual exhibition of the society, which will be opened to the public Tuesday, October 3 and continue four days. A chief of the special police is to be appointed and Pinkerton detectives will be employed to assist in maintaining order on the grounds and preventing violations of the law. The special policemen will be divided into day and night forces and a number of the policemen will be mounted.

BUCHANAN-SCHUCHMAN

Thursday morning at 10:30 o'clock William Buchanan, of Pittsburgh and Miss Catharine Bowers Schuchman, formerly of Chambersburg, were married at the home of Rev. Dr. W. C. Cremer. After the ceremony the couple were entertained at the home of Mrs. Kate M. Shover, a close personal friend of the bride. Mr. and Mrs. Buchanan left in the afternoon for a trip to Gettysburg, Washington and other eastern cities. They will reside in Pittsburgh.

SOME ONE will be sorry if you do not get the particulars about what \$1300.00 will buy in the shape of a home in Cashtown, right along the pike and on the corner of the cross roads, good buildings and a large lot. Get busy and write to R. O. Hafer, Chambersburg, Pa., about this splendid proposition.

LOST: fountain pen and lead pencil in leather case. Reward if returned to Times office.

TEN shares of Biglerville Bank stock for sale. Apply Hannah Slaybaugh, Biglerville, Pa.

SIX room house for rent on East Middle street. B. F. Lightner.

GOOD THINGS AT AUTUMN MARKET

First Day of Autumn Sees no Decrease in Quantity of Good Things to Eat. New Variety of Corn. Half a Thousand Watermelons.

Even though Fall was formally ushered in this morning the wagons at the Saturday curb market continued to present an attractive array of the finest kinds of fresh fruits and vegetables. All sorts of good things to eat, fresh from Adams County's gardens and orchards were offered and in sufficient quantity to supply all, peaches being the only thing in which any shortage was noted.

John Garretson's load of watermelons was one of the principal objects of interest at the Saturday market. Mr. Garretson brought in a large two horse wagonload containing no less than 525 melons. The fruit of this kind raised in Adams County is not large but exceptionally sweet and the home grown melons are eagerly sought by those who patronize the curb market.

Another point of interest was the display of corn by A. J. Spangler. Mr. Spangler this year raised a quantity of Brazilian flour stewing corn. He planted it on land that had had no manure for fifteen years and phosphate was the only fertilizer used. From one grain of seed corn he secured as high as six stalks each bearing from two to four ears. The corn is said to be very good and, as the ears are large, Mr. Spangler feels that it is an unusually profitable variety to raise.

Apples, pumpkins, canteloupes, beets, sweet potatoes, yams, Irish potatoes, tomatoes, grapes, and many other tempting things were displayed at the market which continues to be Gettysburg's great thrice a week attraction.

LOCAL ENTRIES AT CARLISLE

Among the entries for the races at the Carlisle fair next week are noted John Fagan's "Jim Starr" and L. M. Slentz's "Irene Bell."

Bright prospects for the Carlisle Fair is the report heard from all sides and preparations have been made to entertain the crowds. The air ship will be the greatest attraction and next to that will be the races. The agricultural and business displays will be on the usual lines. However the potato exhibit will have a serious handicap as the average Cumberland county potato this year is of good egg size.

The exhibition buildings have been renovated and are in good trim and the grounds never looked better. The Eighth Regiment band has been engaged for the week but on Thursday there will be two bands. The additional one has not yet been selected.

NEW RAILROAD SCHEDULE

A new schedule goes into effect on the Western Maryland on Sunday. The morning train east is changed from 8:07 to 8:42; the afternoon train east from 3:20 to 3:42; and the evening train west from 6:40 to 5:45. The 10:08; 12:10 and 1:00 trains remain unchanged. The Sunday morning train from York will arrive at Gettysburg at 10:35. The Sunday morning Pen Mar train is taken off Sunday evening local to York leaves at 5:40. Sunday evening train for New Oxford, Hanover and Baltimore and intermediate points leaves Gettysburg at 5:50.

SCOUTS TAKE HIKE

The Gettysburg Boy Scouts took a hike to Hereter's Dam and return today. An early start was made so that the boys could get back in time for the game between Gettysburg and Middletown. They carried their haversacks with sufficient "rations" for one meal and ate in the woods near the Highland township resort. The hike was one of a number which the local Scouts hope to take during the fall months.

VICTIMS OF EXPLOSION RECOVER

Calvin Laughman, who was injured by a premature explosion of a charge of dynamite at the Bittinger stone quarry, Bittinger's station, several weeks ago, was discharged from the York hospital on Wednesday. Frank Warnicke, who was also injured by the same explosion, was discharged this week.

CATTLE for sale. Will have for sale at Fuhrman stock yard, Gettysburg, Pa., next Monday, September 25th, one carload of well bred stock. Bulls and heifers weigh from 400 to 500 pounds. Also one load Virginia feeders weigh from 900 to 1000 will be sold. Well worth the money. C. T. Lower.

ANNOUNCEMENT: Penrose Myers, watchmaker and jeweler, is again personally conducting his old stand and will personally repair all watches, clocks, jewelry, etc.

PROGRESS MADE ON ST. JAMES

New St. James Lutheran Church will be Imposing Structure as May be seen from Present Appearance of the Building.

The new St. James Lutheran church has now reached a point in its construction where the general appearance of both the exterior and the interior of the building can be judged by an inspection of the structure as completed up to this time. The large circular window, above which the comb of the roof will rise about sixteen feet, gives some idea of the height of the main auditorium while the supports for the roof over the Sunday School room are now in place and show the size of that portion.

Probably the most interesting part of the building at the present time is the Sunday School room. The large gallery, which is expected to accommodate hundred, is clearly defined and the general outlines of the interior of the room can be seen. This portion of the building is expected to have a capacity of 700 and the auditorium will seat the same number.

The huge bridge trusses, ninety feet in length, which will support the roof over the main auditorium, are being got in shape for placement. The walls are up so high now that it is necessary to raise the heavy steel to a considerable height. It is then lowered to the floor and will have to be raised again when the supports are ready.

The tower will be about sixty feet in height and will not have a spire but will be of the same general character as that of the United Brethren church on High street. The large capacity of the main auditorium can be correctly understood only when the large galleries are taken into account.

The brick work of the church is especially attractive and after the white deposit on the exterior is overcome, which will be in a comparatively short time the walls will present a very handsome appearance. The windows which are to be placed in the main auditorium will be very attractive and the church will be one of the most imposing structures in the town. It is hoped that the rear part will be sufficiently advanced to have the Christmas exercises held there but many things must be taken into consideration in working to that end.

TO MARRY IN INDIA

Two Carlisle people, both well known in Gettysburg, are the principals in a romance soon to culminate in their marriage.

Within a few days Miss M. Elizabeth Evans will begin a 10,000 mile journey to become a bride and a missionary at Guntur, India. As the climax to a romance that had its inception in their youth, she will marry Rev. J. Roy Strook, formerly of Carlisle, but now vice principal of the Arthur Watts Lutheran College at Guntur, India, soon after her arrival there.

Rev. Mr. Strook is a graduate of the Gettysburg Theological Seminary. Three years ago Mr. Strook went to the Indian mission field. Miss Evans will sail from New York on September 26 and after three weeks in Europe will leave from Naples for Ceylon. She will be met by Mr. Strook, who will accompany her to Guntur. It is expected that the ceremony will take place about October 3.

TENER AT DEDICATION

Announcement is made that Governor John K. Tener has accepted an invitation to attend the dedicatory ceremonies of the Hanover Public Library October 3, at the solicitation of Congressman Lefean. Acceptances have been received from other distinguished persons. The library faces Union Station plaza and is said to have cost \$50,000.

BUILDING HOME

Miss Margaret C. Lawrence who has recently purchased a lot near New Oxford from L. G. Lawrence is erecting a fine dwelling. The property will be completed by spring. F. M. Lingg will take possession by April 1st.

PLANING MILL for sale: new brick building 56 x 80 feet with steam power, brick smoke stack and 18 wood working machines, railroad siding, 1 3/4 acres of ground. This property is located in one of the best towns in Adams county and will be sold on account of ill health of the owner. Price \$4800. Inquire of Rank and Peckman, Gettysburg, Pa.

Lewis Kirssin's store will be closed Saturday, September 23, 1911, on account of holiday.

WANTED: a man and woman or two women to do general work at the Hoffman Orphanage. Apply to Rev. T. J. Barkley.

PERSONAL NOTES AND BRIEF ITEMS

Paragraphs of News Telling of the Happenings in and about Town. People Visiting here and those Sojourning Elsewhere.

Miss Lillie Long has returned home after visiting friends in Hanover.

R. A. Myers has returned home from Westminster where he spent the past few days.

Mrs. Charles Williams is visiting friends in Washington, D. C.

Misses Hope and Ursula Sterner, of Gardners Station, spent the day with friends in town.

Prof. and Mrs. L. D. Crunkleton and son, of Littlestown, were Gettysburg visitors today. Accompanying them were Prof. Crunkleton's parents, of Greencastle.

Miss Lillian Kissinger and Miss Harriet Miller, are spending a few days in Orttanna.

Miss Mary Troxell, who is teaching school in Abbotstown, is spending the week-end with her mother.

Mr. and Mrs. Norman S. Heindel and family have returned from Baltimore, where they spent the past few days.

W. M. Duncan, president of the Ozarka Company, of Eureka Springs, Arkansas, is spending some time with his mother on Lincoln avenue.

J. McCrea Dickson is visiting friends in York for several days.

Raymond F. Topper spent Friday evening with friends in Littlestown.

Miss Sara Kluck and Miss Viola Tawney have returned home after spending several days in Hanover.

Miss Jennie Howard has returned to her home on Carlisle street, after spending several days in Hanover.

Miss Margaret Schriver visited friends in Littlestown Friday evening.

LARGE EXCURSION

One hundred and forty six tickets were sold from this point this morning for the Knights of the Macabees' excursion to Baltimore. Among those who took advantage of the excursion were, Mrs. Peter Bruner, Mrs. Wayne Keet, Mrs. George F. Young, Mrs. Homan, Mrs. Edward Culp, Mrs. Myers, Mrs. J. L. Butt and daughter; Abraham Warren, Mrs. Calvin Gilbert, Bernard Partidge, Mrs. Maurice Miller, Miss Nellie Kelly, Mrs. J. E. Musselman, Rogers Musselman, Mr. and Mrs. James O. Weaver, Mrs. Louise Weaver, Miss Fannie Troxell, John Lynn, Frank Schriver, D. C. Stallsmith, N. H. Musselman, George L. Kieffer, J. A. Cox, Raymond Rudy, Charles Hintereutsch, R. E. Houser, Mrs. J. A. Apple, Misses Elsie and Mary Apple, Mrs. Edward Smith.

HAS ONE DEPOSITOR

The Chambersburg Postal Savings Department was opened on Monday, September 11th. So far it cannot be said that it has been overruled with business for up to date the first depositor, Miss Leah Mahon, daughter of the former Congressman, has been the only one, not another man, woman or child having deposited a cent since that first one on the first day.

The Gettysburg postal savings bank continues to receive liberal patronage and for the first day and a half of its existence no less than seventeen depositors opened accounts. It is expected that this number will increase steadily.

MRS. WILLIAM C. LOTT

Mrs. William C. Lott, died at her home on Steinwehr avenue this morning at 8:15 o'clock, aged 76 years and 11 days.

She leaves four sisters, Mrs. Mary Wonderly, of Inavale, Nebraska; Mrs. Amelia Moore, of Hiawatha, Kansas; Mrs. Clara Hoffman, of Carlisle; Miss Catharine Wolf, of Gettysburg; two brothers, Jacob S. Wolf, of Selma, Kansas; Samuel U. Wolf, of Carlisle, one daughter, Mrs. Ella M. Walter, of Gettysburg, and one son, W. I. Lott, of Junction City, Kansas.

Funeral notice later.

CHOOSE GETTYSBURG

The Sixth Pennsylvania Reserves Association which met in Scranton this week selected Gettysburg as their place of meeting for next year.

McIlhenny Brothers have a nice lot of new corn to retail at 60 cents per bushel. Give them a call.

THE CONSERVATION CONGRESS.

There is to be held at Kansas City this month, Sept. 25, 26 and 27, a gathering of more than usual interest to tillers of the soil, the annual congress of the National Conservation association. The idea which will be kept uppermost in the addresses and discussions will be the conservation problem as affecting the farmer in his handling of the soil. Some of the most noted authorities in the country in their respective lines are to be on hand and give those who attend the benefit of their research and experience. Among the speakers will be Professor Hopkins of Illinois, who will tell of "Soil Chemistry." Professor Mumford of Missouri will speak on "Stock Raising and Soil Fertility," ex-Governor Hoar of Wisconsin on "Dairying and Fertility" and Professor Ten Eyck of Kansas on "Soil Physics." These and other allied subjects will be thoroughly discussed. The place appointed for the meeting is central, and there are literally thousands of farmers who could well afford to go hundreds of miles to attend the sessions.

HOGGING DOWN CORN.

The wisdom of hogging down corn seems to depend on whether the fencing needed to carry it out satisfactorily will come to more than the saving effected by having the hogs do the husking. Two years' experiments conducted by the Minnesota station showed that hogs in a cornfield required only two-thirds as much feed to make a given amount of grain as did those kept in a dry lot, while those in the field made as much gain in seventy-five days as did dry lot hogs in a hundred days. The field hogs seemed to be the more thrifty and to eat their rations with a good deal more relish. Pigs weighing a hundred pounds or more make the most rapid gains under field conditions. Before being turned into the corn they should be fed new corn in the dry lot in gradually increasing amounts, so that they won't have their system upset by contracting the worms. The field to be hogged down should be fenced off in such a manner that there will be an average of from a dozen to twenty pigs per acre, depending somewhat upon their size.

ERNEST NATHAN.

Mayor of Rome Who Spoke to
100,000 People.

ROME CELEBRATES FREEDOM

Observes Forty-first Anniversary of Fall of Temporal Power.

Rome, Sept. 23.—The forty-first anniversary of the taking of Rome by Italian troops under Cadorna and the fall of the temporal power of the pope was celebrated by hundreds of societies.

With banners flying 100,000 persons marched to the breach of the city wall through which the troops entered the city.

There the enormous crowd listened to the speech of Mayor Nathan, which had been expected eagerly because of the mayor's references to the Vatican last year. Although his remarks were strongly patriotic, Signor Nathan made only passing reference to the church.

ARMY AND NAVY PLAY IN PHILADELPHIA

Annual Football Game to be Held at U. of P.

Philadelphia, Sept. 23.—The annual football clash between the Annapolis and West Point football squads will be held on Franklin Field as heretofore, thanks to the settlement of the ticket question with the University of Pennsylvania authorities.

Three other fields under consideration have been the Philadelphia National League base ball park, the Princeton university field and the Polo grounds, New York.

It is said both the army and navy are loath to play in professional base ball parks. Dr. J. W. White, of the university, said the game would be played on Franklin Field. There is doubt as to the date, but it will be on the Saturday before or after Thanksgiving day.

WOMAN DEAD AT 108

Mrs. Wonderly Succumbs at Methodist Home in Philadelphia.

Philadelphia, Sept. 23.—Mrs. Elizabeth Wonderly died at the Methodist Episcopal home, at the age of 108 years, four months and four days.

She was one of the oldest women in Philadelphia, and in recent years her birthday was marked by a reception which the aged woman, bright and in full possession of all her faculties almost until the end, held for a host of friends.

On the 17th of last May, when Mrs. Wonderly had completed her 108th year, the annual reception could not be held, however, because her health was not so good. Since then she has slowly declined, and it was certain by the management of the home that she had seen her last birthday. Mrs. Wonderly had been an inmate of the Methodist home for twenty-two years.

To Command Patriarchs Militant.

Indianapolis, Ind., Sept. 23.—Major General A. R. Stocker, of Miamisburg, Ohio, was appointed commander of the Patriarchs Militant, the military branch of the Old Fellows, by Grand Sire John B. Cockrum. The appointment was ratified by the Sovereign Grand Lodge.

COURT HOUSE PLANS MISSING

All Efforts to Locate Them
Are Futile.

SUB-CONTRACTORS CALLED

Conspiracy Trial at Wilkes-Barre
Drags Along Slowly—The Evidence
Shows Inferior Material Was Used.

Wilkes-Barre, Pa., Sept. 23.—The commonwealth made a determined effort to learn the whereabouts of the original plans for the \$2,500,000 court house at the trial of Frank Carlucci, contractor, and Harry French and Frederick McCormick, architects of the building, who are charged with conspiracy.

The efforts of the state failed, although it was ascertained that many persons have had an opportunity of seeing the plans.

County Prosecutor Smith testified that when the cases were first down for trial, Abram Salsburg, then district attorney, took many of the original plans and specifications from the county commissioners' office. Salsburg said that he gave the key to his vault, in which the plans were stored, to County Detective Mackin, and the latter gave the key to former Judge F. W. Wheaton, now one of the attorneys for the defense.

Judge Wheaton took the stand and declared that he had secured only a few, that District Attorney Valentine knew of them and that he had offered to turn them over to the commonwealth at any time. These, however, were not the plans the commonwealth seeks, and for a time the inquiry has ended.

More evidence was given regarding the use of inferior materials for those specified in the plans.

R. H. Naughton, of New York, examined samples of the ornamental decorating in the court rooms and corridors, which were to have been done with Keene cement, and testified that they were of plaster of paris, together with mortar and lime, and that there was no trace of Keene cement.

J. Monroe Hewitt, also of New York, declared that he had examined the plans in the architect's office and found there were two sets, one calling for eight columns in each court room and another for four columns. Four columns were built, and the commonwealth alleges that the county did not get the proper credit for the lack of the other four in each room.

Oreste Formigli, sub-contractor in charge of the interior decorating, was called, but his testimony was not of much importance. He declined to answer many questions on the ground that he might incriminate himself. He is under indictment for conspiracy.

Wilson J. Smith, original contractor, also testified that no Keene cement was used in the decorative work, but he was not allowed to go into any details.

WHEAT PRICES JUMP

An Increase of 25 to 35 Cents a Barrel on Flour Is Expected.

Chicago, Ill., Sept. 23.—Wheat jumped up as much as 3½ cents a bushel as a result of the defeat of reciprocity with Canada.

That was the extreme rise for May delivery. Most of the trading took place at a much less advance, running down to 1½ cents. Considerable excitement was shown in oats also, the latter making a gain of 1 to 1½ cents.

So lively was the trading that it was impossible to follow individual operations. Every foot of room on the steps of the pit supported one or more wildly shouting brokers, and looking down from the galleries the crowd below seemed like a mass of rapidly waving arms, the owners of which could not be distinguished.

May delivery of wheat went to \$1.05½, against \$1.01½ at the close the night before. May oats sold at 49½ cents, compared with 47½ cents the night before. Profit-taking on the part of lucky owners prevented any greater advance, at least for the time.

It was the general gossip that an increase of 25 to 35 cents a barrel on flour would be inevitable.

State Will Aid at Lynch Trials.

Cotatesville, Pa., Sept. 23.—News was received here from Harrisburg that Deputy Attorney General J. E. B. Cunningham will take part with the prosecution in the trials of the men indicted for the lynching of Zach Walker. The trials will start at West Chester on Oct. 2. The state was invited to assist by District Attorney Gawthrop, the same in the grand jury inquiry. Mr. Cunningham was chosen to aid the prosecution at the trials before he appeared at the grand jury sessions.

Has 41 Murders in 38 Weeks.

Dallas, Tex., Sept. 23.—When J. V. Harris, a street car conductor, was shot and killed by D. L. Hoffman, a street car motorman, homicide No. 41 for the city of Dallas in the 38 weeks of the current year, since Jan. 1, 1911, was recorded. This probably makes a record for the country at large in cities of 100,000 inhabitants.

Big Woman Dead.

Wakefield, Mass., Sept. 23.—Mrs. Lena M. Richards, who weighed 500 pounds, died at her home. She was thirty-three years old and six feet tall.

AVIATOR BURNED; FALL KILLS ANOTHER

Loses Life in Air When Gasoline Tank Explodes.

Piqua, Ohio, Sept. 23.—Whirling about in midair, his body a flaming torch, Frank Miller, a Cleveland aviator, was burned to death and dropped to the ground, a charred and lifeless mass, in the sight of thousands of horrified spectators at the Miami county fair, at Troy, Ohio, near here.

Miller had just completed a flight around the fair grounds about 200 feet from the ground in his Curtiss biplane. As he made a final sweep towards his landing place there was a blinding flash, and his gasoline tank exploded. A twist of the steering wheel sent the plane up in the air, and then Miller lost control and the flaming gasoline enveloped him. Like a shot out of a cannon the aviator and machine dropped to the ground. Miller was dead, his machine consumed by flames.

Falls With Plane to Death.

Elmira, N. Y., Sept. 23.—"Dare Devil" Castilane, an aviator, fell to his death at the Mansfield, Pa., fair. He had started an exhibition flight, and when three-quarters of a mile from the ground his machine suddenly turned and fell upon a hillside. Castilane was buried beneath the wreckage of his engine and plane. His wife saw the aviator fall to his death.

WARD ABANDONS RACE

Aviator Takes Tumble, Again Damaging His Aeroplane.

Hornell, N. Y., Sept. 23.—James J. Ward, the aviator, resumed his flight to the Pacific coast from Addison.

After flying about five miles some trouble developed in his engine and the machine dropped to the earth, a distance of about sixty feet, near Rathbone, and was badly damaged.

Ward escaped serious injury and returned to Addison on foot.

James P. Murphy, the manager for Ward, announced later at Lockport that Ward has withdrawn from the race as a result of his fall.

Rodgers at Elmira.

Elmira, N. Y., Sept. 23.—Aviator Calbraith Rodgers reached Elmira, having traveled approximately 172 miles. After circling about the city he landed, expressing himself as being elated because of his successful effort of the day.

Was a Friend of Lincoln.

Berlin, Sept. 23.—Hermann Kreisemann, the father of Berlin's transport development, who was appointed by President Lincoln, a personal friend of his, as the first American consul general at Berlin, died in Switzerland.

GENERAL MARKETS

PHILADELPHIA.—FLOUR quiet; winter clear, \$3.30@3.70; city mills, fancy, \$5.75@6.

WHY bother with cooking in the middle of the day when you can get your dinners at Raymond's Restaurant?

A HEALTHY, HAPPY OLD AGE

May be promoted by those who gently cleanse the system, now and then, when in need of a laxative remedy, by taking a desertspoonful of the ever refreshing, wholesome and truly beneficial Syrup of Figs and Elixir of Senna, which is the only family laxative generally approved by the most eminent physicians, because it acts in a natural, strengthening way and warms and tones up the internal organs without weakening them. It is equally beneficial for the very young and the middle aged, as it is always efficient and free from all harmful ingredients. To get its beneficial effects it is always necessary to buy the genuine, bearing the name of the Company—California Fig Syrup Co.—plainly printed on the front of every package.

DON'T PULL OUT THE GRAY HAIRS

A Few Applications of a Simple Remedy Will Bring Back the Natural Color.

"Pull out one gray hair and a dozen will take its place" is an old saying, which is, to a great extent, true, if no steps are taken to stop the cause. When gray hairs appear it is a sign that Nature needs assistance. It is Nature's call for help. Gray hair, dull, lifeless hair, or hair that is falling out, is not necessarily a sign of advancing age, for here are thousands of elderly people with perfect heads of hair without a single streak of gray.

When gray hairs come, or when the hair seems to be lifeless or dead, some good, reliable hair-restoring treatment should be resorted to at once. Specialists say that one of the best preparations to use is the old-fashioned "Sage Tea" which our grandfathers used. The best preparation of this kind is Wyeth's Sage and Sulphur Hair Remedy, a preparation of domestic sage and sulphur, scientifically compounded with later discovered hair tonics and stimulants, the whole mixture being carefully balanced and tested by experts.

Wyeth's Sage and Sulphur is clean and wholesome and perfectly harmless. It refreshes dry, parched hair, removes dandruff and gradually restores faded or gray hair to its natural color.

Don't delay another minute. Start using Wyeth's Sage and Sulphur at once and see what a difference a few days' treatment will make in your hair.

This preparation is offered to the public at fifty cents a bottle, and is recommended and sold by all druggists.

People's Drug Store, Special Agent for Gettysburg.

PUBLIC SALE

of Three Fine Farms of Limestone land and 12 Tracts of Mountain Land along P. & R. Railroad, between Mt. Holly Springs and Shippensburg, on

Thursday, Sept. 28, '11

The undersigned administrator of the estate of Joseph Widder late of Pennsylvania, Cumberland County, Pa., deceased, will, by virtue of Power of Attorney from the heirs-at-law of Joseph Widder, offer at public sale, on the Homestead farm, near Hays' Grove, the following described tracts of real estate.

TRACT NO. 1.

The Homestead Farm in Penn township, bounded by Walnut Bottom road, Brindle heirs, Wm. Moore, Means heirs, Pine road, Edwin Pekar, and other lands of Joseph Widder, containing 135 acres, more or less, with 24 story stone house, wash house, all under slate and steel roof, Bank barn and wagon shed under slate roof, spring house, hog pens and blacksmith shop, lime kiln, three wells, cistern, young orchard, etc., fences and buildings all in good repair.

TRACT NO. 2.

Farm known as the Newcomer farm, bounded by Pine Road, Henry Cockley, Rupert and Snake and other lands of Joseph Widder, containing 95 acres more or less, with 24 story frame house, bank barn, and other buildings, excellent well. All in good repair, land in high state of cultivation.

TRACT NO. 3.

Farm known as the Gible farm, bounded by the Pine road, John Rupert, Jacob Keller, and other lands of Joseph Widder, containing 87 acres, more or less, with 24 story brick house, new frame addition, bank barn and other buildings, well, cistern, orchard. All in good condition.

These farms are well located.

Sale will commence at 9:30 a. m. Teams will meet trains at Hays' Grove. Lunch provided.

W. L. SHEAFFER,
Attorney for Heirs.

Jos. L. Miller, aucr.

Bronchitis Conquered

Seventy Years Old and Praises Wonderful HYOMEI

I had a severe attack of La Grippe. It left me with bronchitis and catarrh of my throat. I became quite deaf in one ear so I could not hear a watch tick. I commenced using your HYOMEI and inhaler and soon got relief, and believe that it saved my life. I have recommended it to many. I am over seventy years old. I have told several prominent doctors what it did for me." Wm. H. Mowder, Washington, N. J., R. F. D. March 16, 1911.

For catarrh, asthma, bronchitis, coughs, colds and catarrhal deafness, HYOMEI is guaranteed by People's Drug Store. Complete outfit including inhaler and bottle HYOMEI \$1.00, separate bottles HYOMEI if afterwards needed 50 cents.

BUY a Kline Kar if you want service and durability. Inquire of local owners, G. C. Parr, Littlestown; Dorsey Dougherty, Gettysburg; or County Commissioner Wm. K. Weikert, Gettysburg, or Wm. Leese, East Berlin. For sale by Kline Kar Co., York, Pa.

PUBLIC SALE of Valuable Machinery

ON FRIDAY, SEPTEMBER 29th, 1911
at the factory of the Gettysburg Construction Company, successor to the Key-stone Straw Stacker Company, in the Borough of Gettysburg, Pa. the under-
signed will sell all its machinery, of which the following is a partial list:

20 horse power Geiser engine on skids, good as new, 12 inch jointer, 24 inch planer, No 1 wood lathe and tools, grind-stone, Lincoln milling machine, single spindle drill press in fine shape, screw lathe, 16 inch swing, good as new, second-hand lathe with countershaft, power metal saw and countershaft, emery wheel base and stones, six vises, blacksmith forge and force blower, anvil, set tire tools, blacksmith tools, three large stoves suitable for school houses, good as new, coal oil stove, six work benches, four trestles, two tables 20 ft. long, shafting, couplings, belts and pulleys, belting from 9 inch down, machine to cover pulleys, new belting 3 1/2 inch wide, electric light fixtures, lot of patterns, one set scales weighing 600 lbs., tools of all kinds, hand saw, chaff blower for any make of thresher, large sign, wrenches, bolt cutters, taps and dies, 2 inch hand auger, twist drills, from 1 1/2 inch down, lot 1 1/2 cold rolled steel shafting, also 1 inch and lot of 1/2, any length, lot of iron rivets, long cast iron slab 8 ft. long, 2 scoop shovels office fixtures and all other machinery in said plant.

Sale to commence at one o'clock P. M. when attendance will be given and terms made known by
Gettysburg Construction Company.
L. H. Warren, Manager.

If you are in need of a Heating Stove or Range, both steel and cast iron, do not fail to see our stock before buying.
CHAS. S. MUMPER & CO

MAKING CIDER VINEGAR.

With the large amount of apple trees that are to be found in most every orchard this fall it will be well to utilize as much of this waste fruit as possible in the making of vinegar. The following recipe, which is a tested one, has been given in these notes before: Use clean fruit and that in which the sugar has developed. On squeezing the juice from the apples strain into clean barrels, filling them about two-thirds full and inserting a plug of absorbent cotton or cloth to keep out dirt and flies. When the juice has stopped working the clear portion should be poured or pumped out and strained if necessary and the barrels carefully rinsed with scalding water. The barrels should then be refilled, a couple of gallons of old vinegar and some mother being added. The change of the alcohol into vinegar will be hastened if several cakes of compressed yeast are put in each barrel, while if the apples were not ripe and sweet the quality of vinegar will be much improved if a few pounds of coffee A sugar are added. When the vinegar is made—a process that may require all the way from six months to a year and a half—the barrels should be filled up and provided with a tight wooden plug to keep out the air and prevent further chemical change. While vinegar will make in a cellar where the temperature ranges from 40 to 55 degrees, the cider will change to vinegar much more rapidly if the temperature is from 60 to 70 degrees F.

100,000 DOZEN BAD EGGS.

The other day Missouri pure food inspectors dumped 100,000 dozen spoiled eggs into the Mississippi river at St. Louis. These were the accumulation of "spots," "rots" and whatnots of countless small town merchants, who rather than offend their customers took the added eggs without candling. At first thought one would say that the country merchant, not the owner of the hens, was the loser in this bad egg transaction, but in the last analysis is he? Doesn't it fall finally on all the producers of eggs who pay the fiddler in a price kept sufficiently low by commission men to cover loss of stuff? There is little question that this is so. It would therefore be decidedly to the advantage of all poultrymen to insist on such market conditions locally as will put a premium on eggs guaranteed good and fresh and make a price for eggs of uncertain pedigree which they are actually worth after they have been candled. This plan would not only be fair and honest, but just to all parties concerned.

A pasture and woodland of 150 odd acres that the writer visited the other day have been used this season as a range for sheep. It was interesting to notice how neatly the entire area had been trimmed, as if by many lawn mowers. The only weeds that were left were the mullein, nettle and smartweed out of dozens of different varieties that are native to the locality. Never has the argument in favor of keeping sheep on the average farm been more nearly demonstrated than in the case of the farm referred to.

PACT BEATEN IN GREAT LANDSLIDE

The Vote in Canada Was a
Great Surprise.

BORDEN TO BE NEW PREMIER

The Liberals, Who Held Power For
Fifteen Years, Are Stunned By The
Vote.

Montreal, Can., Sept. 23.—Canada is confronted by a new and startling situation, developed from the fact that the reciprocity agreement with the United States has been rejected; that the Laurier government had been overthrown, and that Robert L. Borden would shortly be called upon to form a Conservative ministry.

That the chances enacted in the parliamentary elections are radical is shown by the overwhelming majority whereby the voters rejected the agreement which Laurier had made with the United States for the mutual removal of duties on food and other natural products, by the defeat of seven cabinet ministers out of the thirteen who went to the polls, and by the political landslide which will retire to private life Sir Wilfrid Laurier, acknowledged to be one of the biggest figures in the British empire.

Out of nine Canadian provinces, only Quebec, Laurier's native place, came anywhere near remaining faithful to him, and Quebec did not do any too well. Ontario, the greatest of the provinces, dealt Laurier a terrible blow, going almost solidly against him, and the same may be said also of Manitoba and British Columbia. Saskatchewan and Alberta, two great wheat raising provinces, gave a mild support to the cause of reciprocity.

Latest returns show 161 Conservatives, 1 Nationalist and 84 Liberals chosen, with five constituencies unheard from. Borden, therefore, comes into power with a majority of 48, that probably will be increased to 50.

Liberals Are Stunned.

The magnitude of the landslide appears to have stunned the Liberals, who have held office for fifteen years, and who firmly believed that they were destined to remain in power for many years to come.

On both sides sympathy is expressed for Sir Wilfrid Laurier. His clean and gallant fight in behalf of reciprocity is recognized as one of the most notable campaigns ever undertaken in Canada. That his efforts were not crowned with success is still a matter of inexplicable amazement to many.

It is probable that the departure of the present governor general, Earl Grey, which was fixed for Oct. 8, may now be deferred for a few days, and if this is done the new governor general, the Duke of Connaught, will also postpone the date of his sailing from England. It is the invariable custom for the returning and incoming governor general to pass each other upon the ocean. Earl Grey is familiar with Canadian affairs and could more conveniently participate in the details of calling and installing a new government.

Sir Wilfrid Laurier is in Quebec. Mr. Borden is in Halifax, from which city he was elected by 200 majority. Both will leave shortly for Ottawa. Sir Wilfrid to close up the affairs of his government and to present his resignation as prime minister, and Mr. Borden to accept the call of the governor general to form a new ministry and to consult with party leaders as to the appointment of his advisers.

Parliament is to be summoned as soon as the election writs are in and the usual formalities which follow an election are completed.

As for the reciprocity agreement, it is not likely to be heard again soon. Any measure of this kind must be introduced from the government side, and it is not likely that Mr. Borden and his followers will make any such move.

C. D. NORTON UNDER KNIFE

First National's Vice President Suffers
Operation In Chicago.

Chicago, Sept. 23.—Charles D. Norton, vice president of the First National bank of New York, is convalescing from an operation in St. Luke's hospital here.

With him is Mrs. Norton, who has been under the knife twice since their arrival in Chicago. None of the couple's friends knew of their presence in Chicago. Mr. Norton formerly was secretary to President Taft.

Kills Son and Himself.

Rochester, N. Y., Sept. 23.—Frank W. Waterstreet, aged sixty years, and his son, Fred Waterstreet, twenty-five years old, are dead, the father a suicide and the murderer of his son. The elder Waterstreet had threatened to commit suicide, and when the son saw him starting for the barn with a rifle, he called to him to bring it back. Waterstreet turned, shot his son dead and, putting the muzzle in his own mouth, blew off his head.

Millionaire Killed by Fall.

Chicago, Sept. 23.—Charles W. Allen, millionaire manufacturer of Kenosha, Wis., was killed when he fell from the fourth floor of the Palmer house.

With the choice and beautiful colors which have been recently developed in the plox it has become one of the most valuable of permanent bedding plants. Besides the deep red, pink and white, there are those of a rich cream color with a pink eye and those of a bright rose color with a red eye. These plants are rather slow growers, spreading by root stalks, but are perennials and very hardy, the roots living through the winter in the open ground without difficulty.

ROBERT L. BORDEN.
New Canadian Premier Is Against
Reciprocity.

CANADA'S REJECTION OF RECIPROCITY

Result of the Election as
Viewed in Washington.

Washington, Sept. 23.—The effect of the Dominion elections upon future trade relations between Canada and the United States was tersely stated by President Taft in his statement that "we will continue to do business at the same old stand." He might have added "and in the same old way."

Existing tariff regulations of both nations will remain in force and present rates will apply. In the meantime, although Canada has slammed the door in the face of Uncle Sam, our door remains open. Government officers point out that Canada will find "welcome" on our front door mat any time she steps upon the porch.

That is to say, the vote in Canada did not nullify the favorable action of the American congress on the reciprocity pact. The law remains upon the statute books until repealed by act of congress that certain enumerated articles shall be admitted free, or at specified reduced rates, from Canada, when similar treatment is accorded entry of like articles into Canada. Moreover, the statute holds out a specific invitation to Canada to "come across."

However, in the present temper of the people of the Dominion and the expressed policy of the incoming new government, it is realized at Washington that it will be "a long, cold day" before such negotiations are entered upon, and certainly it will rest with Canada to make the overtures.

ROBBERS MAKE BIG HAUL

Steal Strong Box Containing \$35,000 In
Gold Dust In Alaska.

Seattle, Wash., Sept. 23.—A special from Kaitag, Alaska, says masked men held up a car on the Iditarod flat tramway one and a half miles from Flat City and stole a strong box containing \$35,000 in gold dust.

The gold dust was the property of Friend, Lawson & James. Friend was in charge. All the circumstances show that the robbery was carefully planned. A large posse has gone in pursuit.

SENTENCED TO DEATH

Stolypin's Assassin Tried by Court-
martial and Condemned.

Kiev, Russia, Sept. 23.—Dmitry Bogroff, the assassin of Premier Stolypin, was tried by court-martial and sentenced to death by hanging.

Bogroff is about twenty-four years old and a graduate of Kiev university. He was a member of the secret police and also a revolutionist, and is said to have been assigned to the murder of Stolypin by the revolutionary organization.

STRIKEBREAKERS AT WORK

Lackawanna Railroad Begins Filling
Trackmen's Places.

Scranton, Pa., Sept. 23.—The Lackawanna railroad, determined to break the strike of its section hands, began the distribution from here of forces of strike-breakers.

These men came largely from New York and Hoboken and were sent to the Bloomsburg, Buffalo and Scranton divisions.

Exploding Engine Kills Six.

Milan, Sept. 23.—A war engine in-vented by Marchese imperiali while undergoing tests at Montichiari exploded with terrific force. Six persons were killed and sixteen seriously injured. Among the wounded is the mar-ches.

Feeding tests which have been made by a number of experiment stations indicate that the ration of ensilage for a dairy cow should be about thirty pounds, for beef cattle fifteen pounds, for wintering calves twenty, dry cows forty pounds and sheep from two to five pounds. With these figures should also be kept in mind the fact that a silo of a common dimension—16 by 30 feet—holds 120 tons of silage when filled.

DENIES STEEL TRUST TO QUIT

Attorney General Has no Plans
For Dissolution.

PANIC IN WALL STREET

Stocks of Corporation Were Thrown
on the Market and Price Rapidly
Broke to Lowest Since 1909.

New York, Sept. 23.—Wall street was in utter confusion. Officials of the United States Steel Corporation maintained their silence, and the situation remained virtually unchanged.

The only fact which stood out from the confused rumors and opinions was the definite statement from Attorney General Wickham that no arrangements for the dissolution of the corporation had been made, and that no such action had been proposed to the department of justice.

The attorney general's statement was made at Bretton Woods, N. H., in the following words:
"No arrangements for the dissolution of the steel trust have been made, or so far as I am aware, proposed to the department of justice."

This put an end to the widely circulated reports that the corporation had proposed a plan of dissolution to the department of justice, with the idea of averting a dissolution suit.

Wall Street In Dark.

Persons in close touch with the situation said that the corporation's officials had formed no definite plan of procedure. Judge E. H. Gary, chairman of the board, read carefully the statement from Washington, indicating the determination of the department of justice to pursue with vigor the investigation of corporations, but declined to comment upon it. At the conclusion of the day of stress and turmoil Wall street was as completely in the dark as at its beginning.

The stock market was overwhelmed by a wild outburst of selling which for a time resulted in demoralization and swift depreciation in market values. Alarm at the rumors of approaching dissolution of the Steel corporation resulted in an enormous volume of selling by holders of the corporation's stock in all parts of the country and in Europe.

The defeat of reciprocity in the Canadian elections contributed to the unsettlement of the market. Not since the panic which grew out of the Northern Pacific "corner" ten years ago has such a convulsion of the stock market occurred.

The scene upon the floor of the stock exchange during the height of the excitement was almost unprecedented. Orders to sell more than 100,000 shares of United States Steel common had accumulated over night.

When the gong signalled the opening of trading a roar went up from the crowd. Brokers struggled with each other in wildest excitement to carry out their orders. For some time it was impossible to learn the prices at which sales were being made, so great was the confusion, and crowds in the brokerage offices hovered about the ticker awaiting the first quotation.

Heavy Selling.

The opening transaction was a block of 45,000 shares, a lot of almost unprecedented size. The price quickly fell 5 points to 53 1/2, the lowest figure since 1909, and a decline of more than 26 points from the highest price of the year, established in February. The preferred stock fell 2 1/2 to 10 1/2, its lowest since 1908. Both issues shared in the recovery. Steel common closed at 56, a loss of 2 1/2. The preferred entirely recovered its loss.

Transactions in Steel common totaled 717,800 shares, the largest amount of a single stock traded in on the exchange since April 15, 1902, when 854,000 shares of Southern railway changed hands. It was the largest total of Steel ever traded in.

IT RAINED FROGS

Savannah and Suburbs Alive With
Diminutive Visitors.

Savannah, Ga., Sept. 23.—Chatham county has apparently been given a fresh supply of frogs by the rainstorm which swept over this section.

The southern section of the city and the adjacent suburbs were alive with the diminutive frogs. Roads, grass and ground for great distances were literally covered with the frogs. The assumption is that the frogs must have come down from the clouds with the rain.

The little visitors were very lively, hopping around in countless numbers dodging street cars, automobiles and horses. The frogs are dark brown in color, with bright shining eyes that apparently desire to see everything there is to be seen. In size they are little larger than bees.

Increased Savings Banks Deposits.

Washington, Sept. 23.—There was 7,493,458 depositors, having \$3,762,401,825, on June 7 in the mutual savings banks of the United States, according to a statement issued by Comptroller of the Currency Murray. The increase in depositors, compared with June, 1910, was only 12,000, but the deposits increased \$100,000,000. All but 21 of the 632 savings banks are in New England and the eastern states.

Sorghum which is to be used for forage should be cut just before the first killing frost and placed in piles of from 500 to 600 pounds, where it may be allowed to remain until it is wanted.

At Cleveland on Aug. 11 Uhlan, the great trotting gelding, driven by his owner, C. K. G. Billings, made a half mile in the record time of 56 1/2 seconds. This breaks the record of one minute flat, held by Major Delmar and made on a Cleveland track in 1900.

FOOTBALL RULES ARE ABOUT SAME

Time Between Quarters Will Be
Greatly Lessened.

CHANGES IN FORWARD PASS.

Play Is Illegal if Moleakin Warrior
Falls to Hold on to Ball—Penalty to
Be Inflicted For Man Working Hid-
den Ball Trick.

The coming football season promises to be one of the most successful in the history of the game. The new rules reduced the number of accidents to a minimum last year, and the rules as now modified promise to eliminate a great deal of the danger of players being hurt.

There have been no radical changes made in the rules from those of last year. A simplified wording of the old rules is about all that has been done.

It was the forward pass that came in for the most attention from the

Photos by American Press Association.
CAPTAINS OF LEADING WESTERN AND
EASTERN TEAMS.

(Benbrook will lead Michigan, Fisher Harvard and Howe Yale.)

rulemakers, and there is much speculation as to whether in its new dress it will be a success.

According to the new rule, a forward pass is illegal when the player receiving it fails to hold on to the ball. When a forward pass is declared illegal it will be returned to the place where it was originally put into play. The same goes on an uncompleted forward pass, which is one that hits the ground before being touched by any player on either side.

This year when a player catches a forward pass the players on the defensive can tackle him as soon as he catches the ball. Under the rules last year he had to wait till the man took at least two steps. There were much confusion and argument as to whether or not the rusher had taken two steps when the tackle was made.

Another important change in the code is that which lessens the time between quarters. Last year the players were obliged to wait so long before resuming play that they became thoroughly chilled, their muscles stiffening and preventing them from putting up their best game.

Now the teams will only pause long enough between quarters to permit of their changing of goals.

In the future the umpire will keep time instead of the head linesman. In the past when a captain wanted to call a halt he had to go to the side lines in order to post the linesman, so time could be taken out. The head linesman will also judge all offside plays instead of only those made by ends, as heretofore.

The rules also provide a penalty for the player resorting to the trick of concealing the ball and such artifices, which did not demonstrate any real football ability. It was on a play where he had the ball hidden under his jersey that Hudson, the Carlisle player, won from Harvard at Cambridge some years ago.

Followers of the game are of the opinion that this will prove the most interesting season in years.

Unprofitable Cows.

The greatest source of loss in the dairy industry is the feeding of unprofitable cows. For example, a certain cheese factory in Ohio in one year paid one of its patrons \$577 for the product of eight cows, while it gave another patron \$9 less, or \$808, for the milk from twenty-two cows. The latter dairyman boarded nearly three times as many cows as the other to get less gross return.

H. J. GULDEN
The well known Mill Wright.
Republican Candidate for
County Commissioner.

H. J. Gulden, candidate for the Republican nomination for County Commissioner, is a son of the late George Gulden, a soldier in Co. G., 165th, Pennsylvania Volunteers, and was born in Mount Pleasant township, June 3, 1849. After the usual term of schooling he learned the trade of wheel and millwrighting and is now one of the most capable millwrights in the State. For ten years he was engaged in business in Mount Pleasant township, but in 1876 moved to Bendersville and in 1879 to Menallen township, his present place of residence. Mr. Gulden has been all his life identified with the Republican party and has given to its welfare and success much time, energy and effort. He is an active member of the Lutheran church and has always been a progressive citizen of the county, using his effort to advance every project that had for its purpose the improvement of the county and its business.

Mr. Gulden has capacity, ability and industry and would fill the office of County Commissioner with advantage to the County and with credit to himself and the Republican party.

Owing to Mr. Gulden's present connections he regrets that he is unable to visit the voters personally and takes this means of soliciting their support.

Cat Beat Him Back.
The grayness of evening was creeping over the little suburb. Far away the shrill voices of newspaper boys could be heard calling the 6:30 edition, and the moon cast its pale beams on the worried woman who stood anxiously leaning over her garden gate.
"I can't make out where my husband has got to," she remarked to a neighbor. "He went out nearly three hours ago with our cat, a bag, two bricks and the clothesline. He was going to the river to drown the cat. Oh, what can have happened to him?"
"Don't worry, dear," said the sympathetic neighbor. "Cats take an awful time to drown, you know."
"But it can't be that keeping him," sobbed the distracted wife, "because the cat came back more than an hour ago."—Tit-Bits.

A Matter of Opinion.
"Marry?"
Father's voice rolled down the stair and into the dim and silent parlor.
"Yes, papa, dear?"
"Ask that young man if he has the time."
A moment of silence.
"Yes, George has his watch with him."
"Then ask him what is the time."
"He says it is 11:48, papa."
"Then ask him if he doesn't think it about bedtime."
Another moment of silence.
"He says, papa," the silvery voice announced impersonally—"he says that he rarely goes to bed before 1, but it seems to him that it is a matter of personal preference merely and that if he were in your place he would go now if he felt sleepy."—Harper's Bazar.

Studies of the Vernacular.
"Sayiz, hoozat?" said the girl at the notion counter.
"Hoozat?" queried the girl at the glove counter.
"Jessa affew diddeno!"
"Lookermin, wotcha mean?"
"Fwedon't, knowiz, wotchablushin-bout?"
"Aintablushin!"
"Yartoo!"
"Minjones yunobetter!"
"Swat yar!"
"Hoofoe mean, anyhow?"
"Fellerspoke wennyass chooroun-ter."
"Diddunsee anyfeller."
"Diddunteeem, either, dajja?"
"Coarsnot."
"Awakamod!"
"Sayookids," interrupted the floor-walker, "quitcherblushin I'll repor-chu!"—Chicago Tribune.

No Hit Games Numerous.
There have been twenty-seven no hit games pitched in the major leagues since they were organized.

THE CEMENT PAINT.
A reader of these notes who is planning to do some outside painting wishes to know the recipe for making the government whitewash, or the White House paint. For the benefit of this reader and others who may be interested we give the recipe again, which is as follows: Slack one-half bushel of stone lime, using enough boiling water to keep it from burning, and keep well covered during the process. When the slacking process is finished add enough more hot water so that it will be possible to strain the solution through a fine strainer—brass or a couple thickesses of gunny sacking. Next dissolve a peck of salt in warm water; also prepare three pounds of rice boiled to a thin paste. The rice and lime-water should first be carefully stirred together while hot and the salt water then added and stirred in. To this add one-fourth pound of Spanish whiting and one pint of liquid glue. This recipe will give about seven gallons, and, if there should not be as much as this, hot water should be added to give the desired amount. Various tints can be given this paint by stirring in dry colors. The paint will give the best results if used hot and should be stirred at frequent intervals to keep the several ingredients thoroughly mixed.

In years past the sile has been looked upon as a device for storing a succulent ration for use in winter, but last year and this its value has been demonstrated as a furnisher of a succulent ration for midsummer, when pastures were burned with drought and heat.

Some of the women of the fashionable upper set in New York city have not only discarded babies as a legitimate accompaniment of womanhood, but have lately cast aside live dogs for dummies, whose legs are operated by means of a string attached to their noses (the dummies).

Smutty corn is nasty to look at, but experiments which have been made in the line of feeding it to dairy cows show that it has no harmful effects whatever. Analyses of smut show it contains a greater percentage of protein than corn, but only about a third as much carbohydrates and fat.

The writer has tasted a good many different kinds of delicious jelly, but believes the best he ever sampled was made recently from wild grapes and Transcendent crabs, the juice of the wild fruit forming from one-third to one-half of the whole. Besides a fine tartness and splendid flavor, it has a beautiful color that makes it an adornment for any table on which it is served.

PROFITABLE AGE TO FATTEN CATTLE.

The fattening of two and three year old cattle has generally been more profitable than feeding yearlings. This has been pretty conclusively demonstrated by practical feeders throughout the Mississippi valley. The Missouri experiment station conducted a rather exhaustive test, and it was found that two-year-old steers make larger gains than yearlings, that they consume from 13 to 22 per cent more grain per day, but that the older cattle fatten in a shorter time and consequently return a greater net profit. Yearlings require less grain for each pound of gain as a rule.

Of course the condition of the animal at the beginning of the feeding period is an important factor and It need hardly be said that the most widely diffused breed of cattle up to date is the Shorthorn. This, says Robert Oliphant Primie, has arisen chiefly from the readiness with which it amalgamates with other breeds, its great aptitude to fatten and to the fact that by using Shorthorn bulls for the purpose of crossing other breeds the crosses so produced inherit the early maturity of the sire, attain greater weights than the cattle of the breed to which the cows belong usually arrive at, and if the latter possess any marked superiority in respect to quality of meat that characteristic is still retained by the cross bred produce. The Shorthorn bull Tongswood Banton, here-with pictured, was first prize two-year-old and champion at the Bath and West of England show.

may to a large extent counteract the influence of age in determining the cheaper gains. Consequently it is rather difficult to determine exactly the age at which animals should be started. As a rule, however, it is undoubtedly more profitable to feed two or three year olds. The margin between the buying and selling price is less with yearlings and with the shorter fattening period already referred to are the two chief factors. Particularly with the cheaper grades of cattle is it desirable to wait until they have passed the yearling stage before putting them into the feed lot.

Select the Male Pig Early.
We have in mind an instance where a somewhat parsimonious swine breeder visited a large herd in the month of August with the idea in mind of selecting a male, says the Iowa Homestead. There were somewhere between 50 and 100 males in this herd, and as feed was high at the time the breeder offered to let his visitor go into the bunch and have his choice for \$25. The visitor, although admitting that there were some like animals in this herd, considered the price too high and did not make a purchase. Time passed, and in the month of December, after the tops of this bunch of males had been sold out, the same man asked for prices on a male. There had been a good demand that season, and the breeder's price then was \$50, and the selection must then be made after forty or fifty of the best had been shipped. The sale was effected, but neither the buyer nor the breeder would claim that the order was filled with as good a pig as could have been purchased for \$25 earlier in the season.

Keep the Young Stock Growing.
One of the biggest mistakes a man can make as a stock raiser is to stint any young animal in food. In the case of the colt it is easy to secure an increase of 200 to 300 pounds in weight by properly handling during the first two years. Yearlings are quite frequently allowed to deplete through neglect to provide a generous ration. Pastures become scanty, flies are annoying, and the colts begin to run down in flesh. Even on good pasture a moderate daily portion of grain will be well invested in securing extra growth of bone and muscle. Some of the most successful horsemen never allow a day to pass from the time their foals are old enough to eat oats without giving them a mess.

Breed From Mature Animals.
A breeder urges the necessity of constitutional vigor in the swine herd. He deprecates the continued use of young sires and dams. "Breeding from mature stock always tends toward keeping up size and vigor," he says. "We need not go further than to look at the results brought about by injudicious breeding of young gilts and sires in our swine. Not only has the size been greatly reduced, but the vitality of the droves has also been reduced until it is not an uncommon sight to see whole droves mowed down with cholera. There is no question that this evil practice has more to do with it than any other thing."

Stock and Fertility.
The greater number of animals that can be kept comfortably upon the farm the better. The more stock the greater fertility of the soil and hence the larger crops each succeeding year, which in turn permit a larger number of animals.

Henriksen Speedy Runner.
Empire Billy Evans says that Olaf Henriksen, the new player the Boston Red Sox recently purchased from the New England bushes, is the smallest and fastest player that has broken into big company in many months. Evans says the player with the Swedish name can run down to second from the initial bag as fast as Ty Cobb. In view of his size, the indicator holder thinks that Henriksen's sprinting feats are wonderful.

YOUNG PITCHERS HAVE SET PACE

Alexander and Gregg Make Veteran Flingers Look to Laurels.

LATTER KEPT NAPS IN RACE.

Cleveland's Young Southpaw One of Season's Greatest Finds—Phillies' Right Hander the Big Noise in National League.

This season has been replete with surprises in the pitching end of baseball. The peculiarity thus far is the rise from obscurity of a pair of young twirlers barely out of their teens. They have set a pace in the two big leagues.

Grover Cleveland Alexander of the Philadelphia Nationals, known as Alexander the Great, who barely escaped going to the minors in the spring, has the distinction of being the first pitcher in the older organization to win twenty games this season and has worked in and won more contests than any other twirler.

No other man who ever broke into the league, with the exception of Russell Ford of New York, has approached this record. Ford won twenty-six games last season, but Alexander bids fair to surpass that figure by many games before the season is over.

In the American league Van Gregg, a youngster secured by Cleveland from the Pacific coast, who had a fair reputation when he came east, has proved invincible and has the remarkable record of fourteen victories out of the first sixteen games in which he has worked.

Unlike Alexander, however, great things were expected of him when he came to Cleveland, but in their fond dreams the Forest City club owners never thought that the coast player would deliver the goods as he has done against virtually all of the clubs which faced him. All batters look alike to him.

Alexander of the Phillies came to the team unheralded, an outcast of two major league clubs. Manager Charlie Doolin had about determined to sell the youngster, whom he secured from the Syracuse club of the New York State league for \$450 when the latter asked for a chance to pitch against the Athletics in the annual spring series between the National and American league teams of Philadelphia.

Doolin, who was loath to let any of his men go without a fair chance to show, gave him the opportunity, and after Alexander had held the world's champions to two hits Doolin decided that he would keep the state leaguer for at least another month.

Doolin's decision to hold the pitcher has kept the team in the race for the National league flag, for Alexander has won more than one-third of the contests for his team and is such a strong worker that he has asked to work every other day. He is after the record made by Jack Coombs of the Athletics last year, when the latter won thirty-one games and lost nine, and hopes to even better this mark.

It is a noteworthy fact that this same pitcher, who is the sensation of the National league, was turned down by Connie Mack, a manager whose mistakes can be counted on the fingers of one hand. He would come in handy now, with the Athletics battling to win the American league pennant again.

Philadelphia is not the only National league team that can boast of a new star. The New York fans have waxed enthusiastic over Rube Marquard, who has at last delivered the goods after three years' trial. The man who for two years had to stand the jeers and witelisms of the fans of the whole circuit has at last shown his form.

Manager McGraw's judgment in paying \$17,000 for him has been vindicated. With Rube going along in his present form New York fans are looking for a pennant and a possible world's championship.

While New York fans are enthusiastic over Marquard, they have not lost sight of the fact that Nap Lajoie is pitching the greatest ball of his career for Brooklyn and that he holds the record of twelve consecutive wins to his credit. The work of this pitcher is the more creditable in that he is with a second division club and therefore has to pitch remarkable ball to win his games.

Lew Riddle, the genial pitcher of the Cubs, is holding his team in the race by his great work, and Earl Moore, a Philadelphia man, is at his best this season and has been quite a surprise to the fans of the old league.

In Pittsburgh "Babe" Adams is again working in great form this season, doing the bulk of the work for the Pirates. Adams is another youngster who sprang into fame in a year by his great work in the world's series against the Detroit team in 1909, when he won the world's championship for the Pittsburgh team.

While his work this season has not been as spectacular as that of some of the other pitchers in the league, it is mainly due to his good pitching that the Pirates are fighting for a berth in the first division.

The fans of St. Louis have discovered this season that the Cardinals are harboring three of the best pitchers who ever played in the league. Sallee, Steele and Harmon are the men, and it is their work which helped St. Louis to make a fine showing.

HUMOR OF THE DAY

A Neighborly Hint.

"No," said Eben Slocum, "we aren't much given to surprise parties or combination gifts here in Cedarville, but once in awhile we do band together when we see real need. For instance, we gave Lem Fowie a load o' good shingles last spring—seven or eight of us neighbors did."

"How did that happen?" asked the summer resident.

"It happened after more or less talk about the way Lem's roof leaked," said Slocum, "and considerable feeling about the way that boy o' his cut up in school and in church."

"We sent the load with a kind of an explanatory note to Lem, and he took the shingles and made good use of 'em—both ways."

"Both ways?" echoed the listener.

"Why, yes," and Slocum looked rather tried at such an exhibition of dullness. "We wrote him that we called by the way his roof leaked and his boy acted that he was out o' shingles and couldn't afford to buy any. I should think 'twas plain enough. 'Twas to Lem anyway."—Youth's Companion.

Practical Illustrations.
Hearing a noise at midnight in one of his rooms, a gentleman tiptoed to the spot, thinking to take the burglar unawares. Sikes, however, was not to be caught napping, and before the owner of the house fully realized what was happening he was looking down the muzzle of a revolver.

"You realize that you are at my mercy?"

"Yes," replied the house owner.

"And also realize that I could shoot you dead if I wished?"

Another trembling affirmative.

"You did not hear me enter the house?"

"No."

"Well, if you had your windows fitted with one of Ketchum's new patent burglar alarms this wouldn't have happened. I am an agent for the—"

But the owner of the house had swooned.—Idios.

One who has caught and helped eat many a salmon is authority for the statement that fresh salmon should be thoroughly cooked and eaten with plenty of salt, owing to a poison (really an amoeba or low form of animal life) which seems to develop and which is active if the fish is in raw or an underdone condition. He tells us that he has seen more than one puppy turn up its toes as a result of eating such salmon.
